REPORT ON VACCINATION DRIVE

VET first Grade college had organised vaccination drive on 29-09-2021, Wednesday on account of World heart day exclusively for students and teachers during the first half of the day between 9am and 2pm and the theme is to harnessing the power of digital health to improve awareness, prevention and management of CVD globally is our goal for Word Heart Day. Telehealth has a huge role to play as we continue to use heart to beat CVD.

People with underlying health conditions, such as heart disease, are more vulnerable to COVID-19. By the beginning of 2020, when we heard of a novel coronavirus with potentially severe consequences, the race was on to learn everything we could and should about it. Before long, and with so much still to be discovered, an unfortunate trend emerged: COVID-19 posed a particular risk to patients with underlying issues such as heart disease, which is already the leading cause of death on the planet. Also emerging was a worrying trend that heart patients, who would usually seek routine care or need to access emergency services for non-COVID-related issues, were avoiding hospitals and doctors. Across the board, countries noted this dramatic drop, attributing it to fear of contracting the virus.

Severe Acute Respiratory Syndrome-Coronavirus-2 SARS-CoV-2, at the root of coronavirus disease or COVID-19, has been claiming lives in ways as diverse as the patient complications observed. It is highly transmissible and strikes with varying forms of severity.

Cardiovascular disease (CVD) patients are more susceptible to severe COVID-19. Diseases affecting some form of heart condition or heart function include hypertension and diabetes, acute coronary syndrome, injury to muscles tissues of the heart, heart failure, and less heard of but prevalent diseases such as rheumatic heart disease and Chagas disease.

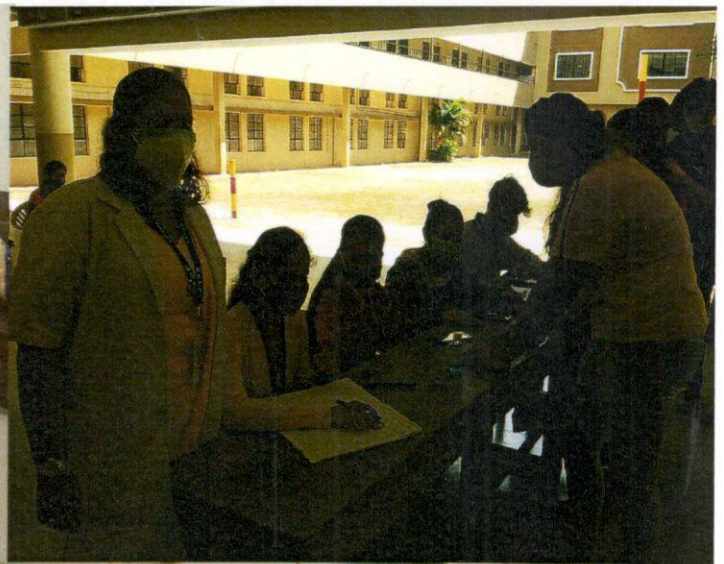

Some practical recommendations, also summed up in the article Understanding the COVID-19 heart connection in low-resource settings aims to support care-giving and treatment, with guidelines across the board.

Students at VET first grade college have been demanding for free vaccination for all the students. Students those who have not received the first dose will be vaccinated and students those who were due for second dose they will be administered Covishield or Covaxinon priority basis.

Total number of vaccination :149

Total number of teaching staff participated :12

Total number of non- teaching staff participated :5
